

Iowa Crop Performance Tests–Corn and Soybean

RFR-A18126

Jim Rouse, director
Iowa Crop Improvement Association
Department of Agronomy

Each year ISU and Iowa Crop Improvement Association conduct public yield performance tests for commercial corn and soybean varieties at 15 locations across Iowa.

Iowa Crop Performance Tests–Corn is conducted to provide information farmers need to select the best hybrids for their production conditions. 2018 was the 99th consecutive year for the test. Yield trial information, testing procedures, and more can be found at croptesting.iastate.edu and http://www.croptesting.iastate.edu/Corn/Docs/2018_ISU_corn_final_report.pdf

Iowa Crop Performance Tests–Soybean is conducted to provide information farmers need to select the best varieties for their production conditions. Yield trial information, testing procedures, and more can be found at croptesting.iastate.edu and
