## Projects at Western Farm

Cuphea production: A potential new crop?  
Soil moisture survey, spring and fall  
Carbon sequestration study  
Long-term impact of tillage systems on soil quality indicators  
Triticale utilization in swine finishing  
Insect monitoring traps; black cutworm moth and western bean cutworm moth  
Integration of pasture systems for cattle finishing programs  
U.S. Weather Service weather station  
Utilization of Condensed Corn Distillers Solubles (CCDS) as a pasture supplement  
and as a finishing ration component  
Dominant grass effects on diversity and functioning of restored grasslands  
The role of plant evenness and dissimilarity in prairie ecosystem process  
and stability rates

### Demonstrations:

Utilizing swine mortalities for alligator production  
Manure settlement basin  
Composting of livestock mortalities  
Composting of hoop buildings manure pack  
Swine finishing in hoop buildings  
Rotational grazing

## Acknowledgments

We would like to thank all members, sustaining members, and donors who support the Western Research and Demonstration Farm through donations of time, money, and products. Their support has made many of this year's trials possible. Thank you.
